Birmingham, UK

WORK EXPERIENCE

Blenheim Palace

July 2024 – September 2024

Data Science Intern

Woodstock, Oxfordshire

- Designed and implemented a predictive staff allocation model in Python, to schedule staff for customer-facing roles based on demand forecasts.
 - The model was integrated into Blenheim's industry leading Smart Visitor Management system, built using Power BI, to enable staff budgeting based on forecasts from the visitor prediction model.
 - Worked in collaboration with academic partners from Oxford Brookes University, and business stakeholders, including the CFO and Managing Director of Visitor Attractions, by communicating ideas and strategies through data visualisation skills.
- Refined the visitor prediction model by improving feature extraction, accounting for patterns and interactions between events at Blenheim Palace and their durations.
 - Improved accuracy of the visitor prediction model by up to 20%, with performance varying based on the prediction lead time.

International Tree Foundation

September 2024

Software Consultant

Oxford

- Implemented an automated workflow for grant managers and clients.
- Introduced a process for automatically generating contracts and securely sending them for signing, reducing administrative time and enhancing security.
- Increased efficiency by automating routine tasks, including communications, to accelerate project management.

UE Coffee Roasters

November 2023 – June 2024

Barista

Witney, Oxfordshire

EDUCATION

University of Birmingham

2020 – 2023

2:1 BSc Computer Science

- Final Year Project involved the design and implementation of a Drum Machine React application with a Node.js backend that ran a Generative VAE to apply a humanised groove to a drum track.

Magdalen College School

2015 – 2020

- A-Levels: Maths (A*), Physics (A), Economics (A), Further Maths (B)
